Web Developer and DevOps enthusiast with a strong focus on frontend development and blockchain. Experienced in building scalable web applications, working with modern DevOps workflows, and developing secure, production-ready systems. Founder & Lead @0DAY Tech Community, actively involved in mentoring peers, organizing technical initiatives, and fostering a collaborative learning culture.

Interests: Backend Systems, DevOps, Cybersecurity, Web3, Cloud-Native Technologies, CI/CD Pipelines

TECHNICAL SKILLS

Languages: C, C++, HTML5, CSS3, Javascript, Typescript, Golang, Python3, Solidity

Frameworks: React.js, Vue.js, Node.js, Flask, Django, Express.js, Bootstrap, Tailwind, MongoDB, SQL(MySQL)

Tools: Git, Docker, Postman, Github, AWS, Firebase

PROFESSIONAL EXPERIENCE

Founder & Lead , 0DAY Community | Adamas University June 2025 - Present

- Organized hands-on workshops, peer learning sessions, and tech discussions on web development, cybersecurity, Web3, and DevOps.
- Built and maintained community projects, encouraging open-source contributions and collaborative problem-solving.
- Led technical initiatives and guided teams through project ideation, development, and deployment.

Freelance Feb 2023 - Present

- Collaborated directly with clients to understand requirements, propose technical solutions, and iterate quickly.
- Delivered end-to-end web and backend solutions for clients, focusing on performance, security, and scalability.

EDUCATION

Adamas University

SGPA: 8.3

Bachelor's in Computer Application

June 2024 - 2028 (Present)

PROJECTS

Kyra - Web3 Password Manager | Next.js, Typescript, Express.js, IPFS, Solidity <https://kyra-seven.vercel.app/>

- Dead Man's Switch Recovery - enables secure vault recovery after prolonged inactivity.
- Decentralized Password Vault - passwords are encrypted client-side and never stored in plaintext.
- Successor Nomination - users can predefine a trusted wallet for emergency recovery.

Aura (Adamas University Retrieval Assistant) | Next.js, Python, Langchain <https://aura-au-bot.vercel.app/>

- Backend-First Implementation - built with FastAPI and modular APIs for scalability and reliability.
- Extensible & Open-Source - users can customize, improve, and contribute via pull requests.
- Privacy-Aware Design - no sensitive user data is exposed or stored unnecessarily.

Signifiya'26 (Annual Tech Fest - Tech Lead) | Next.js, Typescript, Postgres www.signifiya.in

- Built and handled the entire automations, website and techiess through out the event and trained a few fellow juniors about webdev.
